

Your Friday Water Report

This Week's Topic:

Raw Water Conveyance / Bradner Inlet Project

It is important to understand that the ability to reliably provide high-quality potable water starts with developing and maintaining suitable raw water infrastructure. The system must provide reliable access to sufficient quantity and quality of raw water, and meet regulatory and institutional requirements. This portion of the raw water conveyance project, is nearing completion. The project which consisted of the installation of approximately 3800 linear feet of 24-inch diameter PVC raw water pipeline, including valves and other appurtenances has had its challenges but will be complete in time to commence the Bradner refill plan. The City Utilities Department is committed to, and will continue working diligently on completing this and all critical water infrastructure projects.

Daily Averages for 10/10-10/16

Gallinas River Flow	2.993 Mgd
This week in 2017 was	28.984 Mgd
Avg. River Diversions	1.828 Mgd
Yr. to date 335.927 Mg*; year max. 908 Mg	
Draw from Wells	0.00 Mgd
This week in 2017 was	0.00 Mgd
Fresh Water Demand	1.415 Mgd
This week in 2017 was	1.255 Mgd

As of 10/16/18:

Bradner Storage	0.00 Mg
Peterson Storage	60.733 Mg
Storrie Lake Storage	240.607Mg
Reservoir Storage	70.0%
Las Vegas Rainfall	0.72"
Snowpack Depth	1 inches
Snowpack Water Equiv.	0.4 inches
This date in 2017 was	0.0 inches

Mgd = Million gal. per day, Mg = million gal

Did You Know?

In some countries, less than half the population has access to clean water.
